Professional Summary

Innovative and highly skilled leader of developer teams with over ten years of experience, specializing in object oriented design and programming, database design, and software development. Utilizes research skills, excellent communication, and adoption of new technologies and programming languages to continually grow the department and foster a healthy team environment. Possesses extensive knowledge of the development process from design, build, test, and deploy while managing deliverables and keeping the team motivated.

—Specialty Skills—

- SQL
- Query Writing and Optimization
- UX Analysis
- Web Services
 - Sisense Business Intelligence Software
- User Interface Design
- PowerBuilder 12, 10.5, 9
- Agile Methodologies
- Web Scraping
- Sybase Adaptive Server
- System Design
- JIRA
- HTML
- Test Driven Development

—Experience With—

- Flask
- SourceTree
- Javascript & JQuery
- SQLAlchemy
- Java Programming
- AWS
- Bitbucket
- Android Development
- Docker

Professional Experience

Profit Tools, Inc., Lee, New Hampshire

Lead Software Developer

2010 – present

Software Developer

2005 – 2010

Team Lead Accomplishments

- Acts as lead mentor and trainer to junior developers; experienced in hiring and training new developers
- Led training efforts for entire department's adoption of AGILE programming techniques
- Enthusiastically supported and motivated team members to attend multiple NH UXPA events to gain proficiency at producing user friendly software, resulting in new skills acquired and a subsequent interface revamp for invoice transfer and the invoice/audit process within the flagship application (Profit Tools)
- Researched and trained the department to adopt Python 2.7 (a previously unused programming language); resulting in a complete overhaul of the billing model, strategically positioning ourselves from a client server application to a web based application for this model and many others
- Continue to attend industry conferences to gain knowledge and utilize cutting edge tech ideas for the team

Accomplishments as a Developer

- Lead developer for upgrades and development on the flagship program (Profit Tools)
 - Reengineered entire equipment tracking model beginning with the underlying Database (DB) while utilizing Model View Controller (MVC) concepts
 - Remodeled the order entry business logic to utilize MVC approach to maintain scalable upgrades
 - Redesigning entire set of Electronic Data Interchange (EDI) transactions from the underlying DB design to the user facing side of the application
 - One of three developers trusted to implement the Driver Vehicle Inspection Report (DVIR) module
 - Implemented the Quick View module; user customizable dashboards used as dispatch and reporting tools to help automate key end user processes
 - Architected a brand new API that third party software vendors can use to create and update orders; a solution that led to high sales and order volume for customizations to maintain the technology
 - Implemented a comprehensive Per Diem/Chassis invoicing and auditing module, directly creating major cost savings for our customers
 - Created a comprehensive user "alert" system within the flagship program (Action Alerts)
 - Assisted in the development of the Business Intelligence functionality of the flagship program
 - Designed and created a comprehensive and customizable rule based system that is used to determine who, what, when, and how data is to be transmitted from the application
- Enhanced customer service satisfaction by creating an internal DB and webservice system that enables Profit Tools and Track and Trace programs to communicate real time with internal customer service team
- Innovated the web scraping methods and worked with one other developer to create Track and Trace

Education

University of New Hampshire, Durham, New Hampshire

Bachelor of Science in Computer Science, 2005
